

PoKeep Location Changer Review: Safer & Best Location Spoofer in 2026

People often want to know how to change location on iPhone because they have needs to protect private or just a fun. This review focuses on one product **PoKeep Location Changer** and shows what it offers for purposes such as privacy protection, app testing, and spoof location in Pokémon Go. And why it is one of the best [GPS spoofing app](#).

Part 1. What is PoKeep Location Changer

[PoKeep Location Changer](#) is a desktop application designed to simulate a device location without requiring jailbreaking or rooting the device. It gives users a way to set a virtual location on a connected smartphone or tablet for play LBS games, protecting privacy, or previewing location-based content. The interface aims to be simple so users can pick a point on a map or enter location and apply the virtual location to their device.

Part 2. Key features of PoKeep Location Changer

1. One click applies to device

After choosing a location users can apply it to the connected device with just one-click, and the device location will update immediately.

2. Route simulation and movement mimicry

It provided multiple movement mode and flexible speed simulation from walk speed to drive speed.

3. Well compatibility

PoKeep Location Changer works well with both iPhone and Android operating systems and support the latest iOS system and Android version.

4. No jailbreak required

The product advertises location change without jailbreaking or otherwise modifying the device system. That lowers technical risk compared with invasive modifications.

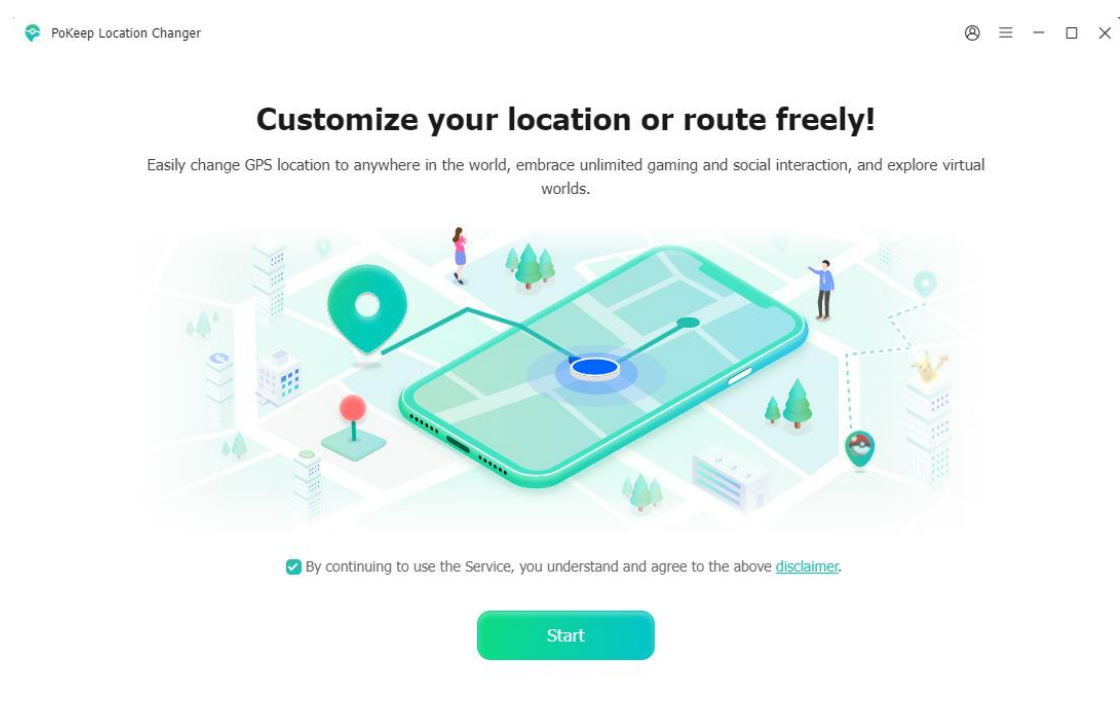

5. Ease of use

The interface focuses on point and click interactions rather than complex scripting. This reduces the difficulty for non-technical users while still offering precise controls for testers.

In addition to its powerful location spoofing features, PoKeep also provides a [Pokémon GO IV calculator](#), helping players make smarter decisions when catching and evolving Pokémon. By combining location flexibility with data-driven insights, users can not only explore rare spawn locations worldwide but also instantly evaluate Pokémon stats to maximize their gameplay efficiency.

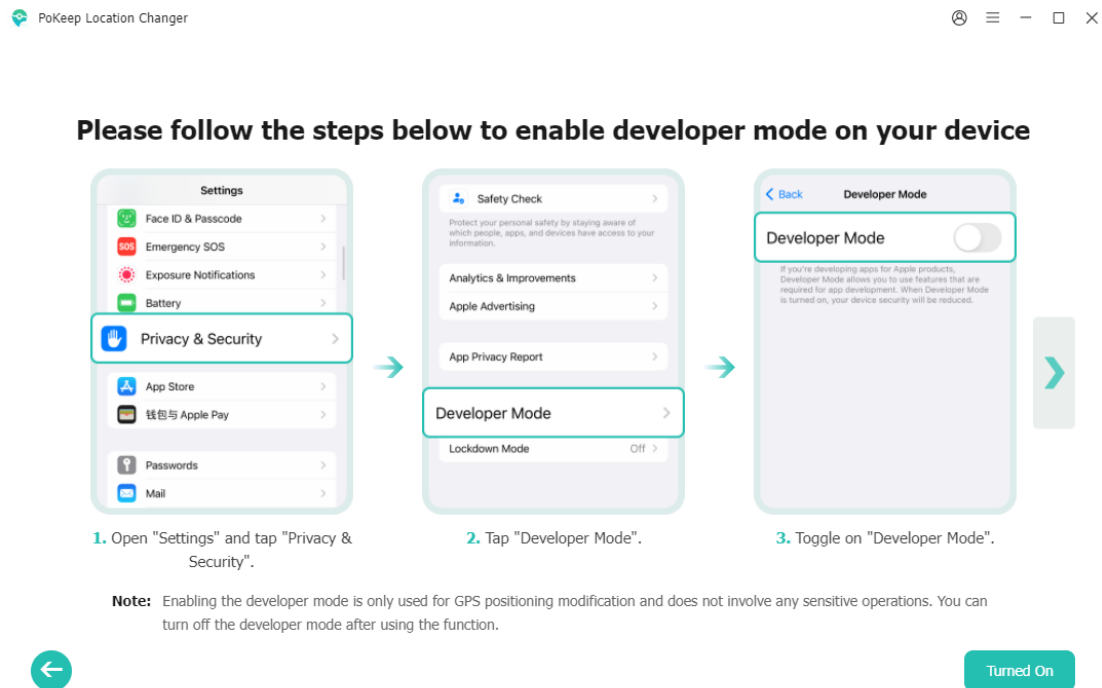

Part 3. Steps to change location with PoKeep Location Changer

1. Install [PoKeep Location Changer](#) on your computer. Connect your iPhone via USB and trust the computer. Launch the program and click the **Start** button.

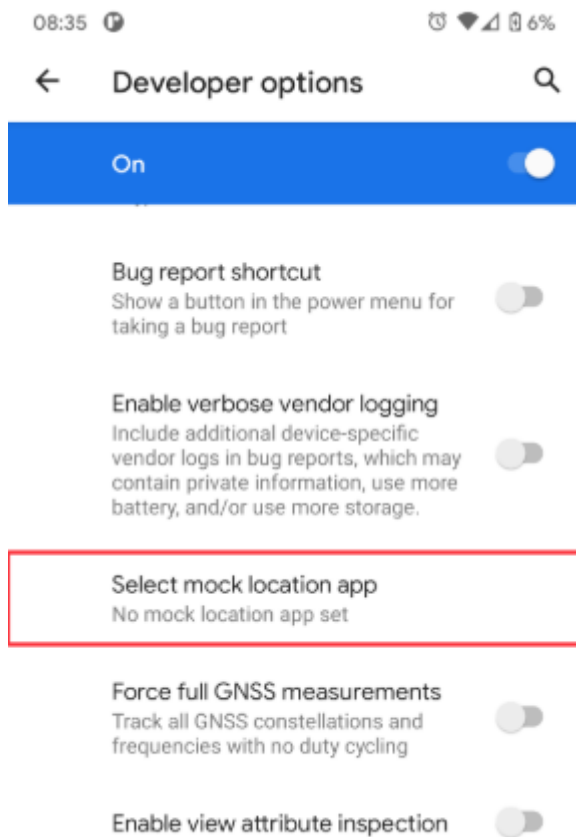

2. Turn on **Developer Mode** according to the on-screen guide.

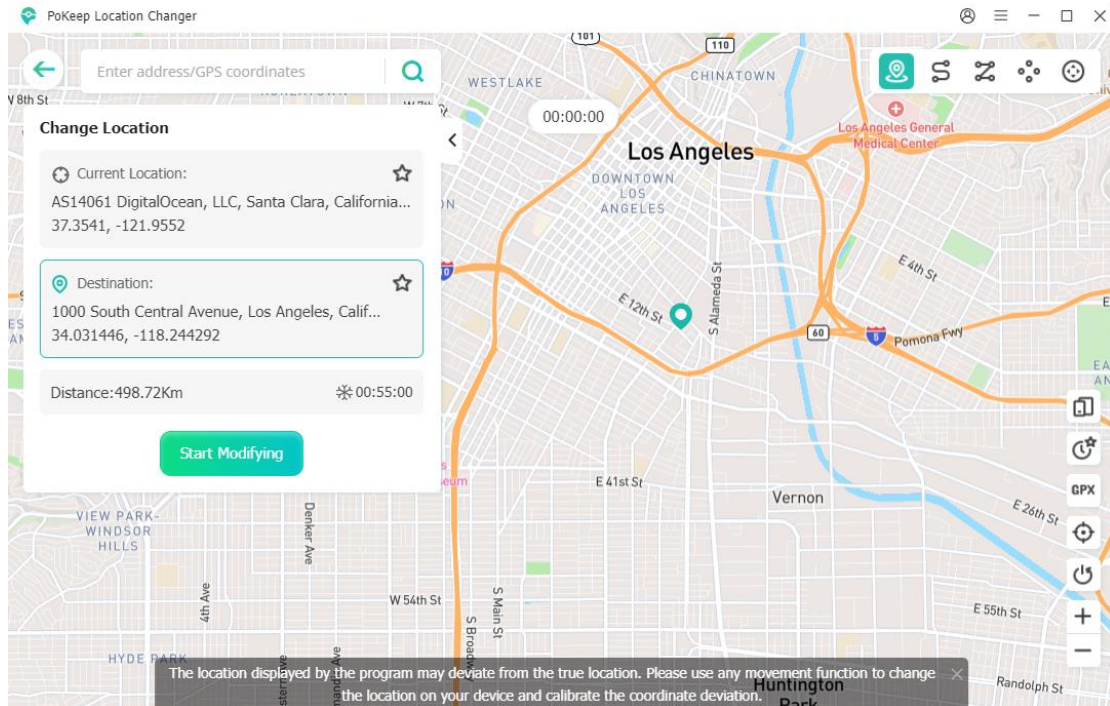

For iPhone: Go to Settings > Privacy & Security > Developer Mode, then enable the Developer Mode button, click the **Restart** option. After the device restarts, tap **Turn On** option, then enter the screen password to turn on Developer Mode. Once complete, click the **Turned On** button to enter the map.

For Android: Choose you phone model, then enable **Developer Mode** and **USB Debugging** on your phone. PoKeep will automatically download Location Changer app. Then in **Developer Options**, select Location Changer as mock location app.

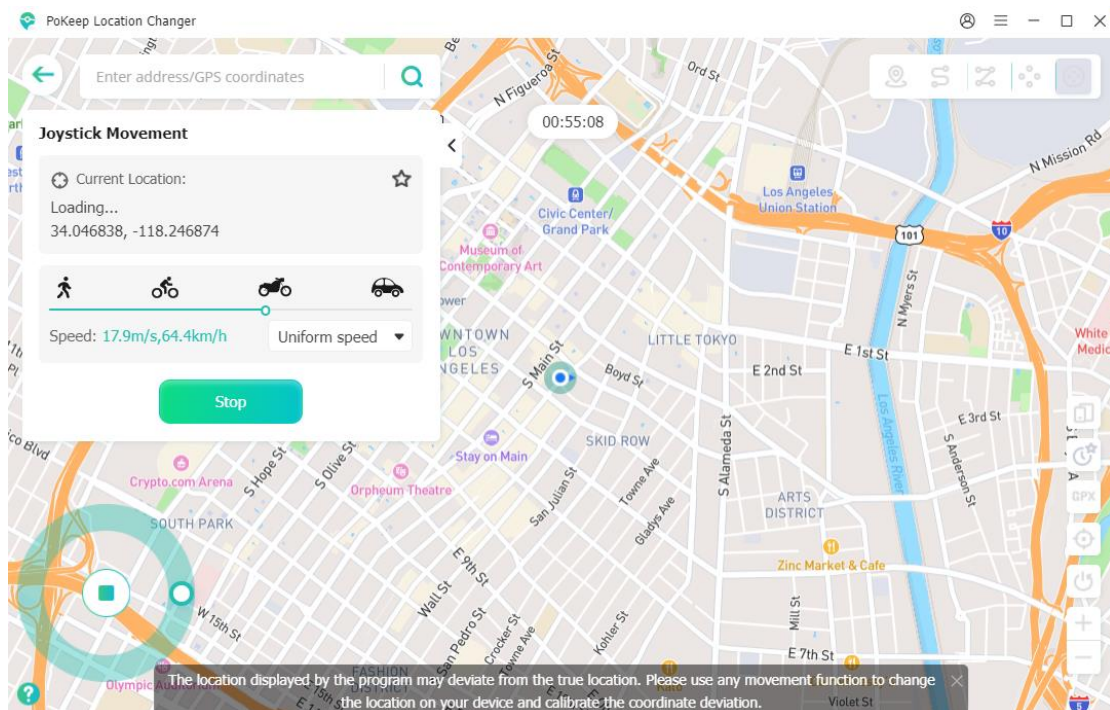

3. Choose change location mode in the top-right. You can click a location on the map or enter a location in the searching box. Then click **Start Modifying**, your location will be changed successfully.

4. Open the Pokémon Go app, and your location will update to the new spot.

Then switch to Movement Mode or Joystick Mode in PoKeep, where you can set custom routes and adjust speed to simulate realistic movement, allowing you to play Pokémon Go without moving.

Part 4. Pros and Cons

Pros:

- Support all iOS and Android versions and will keep update to support the latest system.
- Virtual joystick offering 360-degree movement control for realistic navigation
- Adjustable movement speed to simulate walking, running, or cycling
- Two-spot, Multi-spot, Jump Teleport automatic movement enabling route planning with multiple waypoints
- Work well with numerous Apps including Pokémon Go, WhatsApp, Life360, Tinder and so on.
- Cooldown timer to manage intervals between movements and reduce detection risk

Cons:

- Need a computer.
- Language of the software is limited.

Part 5. Pricing and trial options

PoKeep typically offers a free trial with limited functionality and paid plans for full features. Trial options let you test basic capabilities before committing to a purchase. Each license plan supports 1 computer and 10 devices at the same time, which is more favorable than other location spoofer. For exact pricing plans:

Part 6. How to choose a best location changer

- Prioritize transparency about capabilities and limits
- Look for a provider that clearly states what the product does and does not do.
- Check compatibility and updates
- Ensure the tool supports your device OS version and look for active updates that keep pace with system changes.

- Read user reviews from trustworthy sources
- Independent user feedback can highlight real world reliability and support quality.

Final Thoughts

PoKeep Location Changer is positioned as a simple location simulation tool for people who need to spoof location in Pokémon Go or protect some aspects of their privacy. If you are searching for a best Pokémon Go spoofer, PoKeep Location Changer is your best choice for its comprehensive functions and affordable price. Use any location changer responsibly and in line with app rules and legal constraints.
